

PDS-21 MOTOR UPDATE – 2021

March 23, 2021 – This is notice to inform distributors and consumers that the 2 Stage Vac Motor utilized in the VIKING PDS-21 (Pressurized Drying System) Wall Cavity Dryer has been updated.

The above image displays the new motor (left) and previous motor (right) attached to the faceplate. Please note that the new motor on the left now has 3 motor mounts, reduced from 4 motor mounts seen on the right. New motors can be attached to existing faceplates with 4 mounting holes by utilizing 3 of 4 mounting points. The 4th motor mount on the old faceplate (red square on the right) can be blocked with nuts, bolts, & washers (red square on the left).

Please note that the fan covers on each motor are different. This will help in distinguishing which replacement brushes you will need to order. New motor (top left) previous motor (top right) correlate with the brushes seen below.

PART # 011-007

PART # ***DISCONTINUED***

New Motor Part # 001-069
Updated Faceplate Part # 192-002
